

**SAN PEDRO CREEK AQUATIC RESTORATION**  
**CONTINUING AUTHORITY, SECTION 206**

PROJECT LOCATION AND DESCRIPTION: The study area is located in Linda Mar, the most populous of the several seaside communities that make up Pacifica, California. San Pedro Creek flows northwesterly for four miles through the narrow San Pedro Valley to the Pacific Ocean. The Capistrano Bridge is located approximately one mile upstream of the existing San Pedro 205 flood control project. The bridge, a concrete box culvert design, presents a serious hazard and obstacle to migrating Steelhead Trout, a threatened species. The proposed project would remove an unsuccessful fish ladder from the bed of the bridge and replace it with a series of step pools. The current stream channel consists of a highly undercut and eroded rectangular gunite channel. The project would restore approximately 600 feet of this stream channel to a natural substrate and gradient. The City of Pacifica is the non-Federal sponsor.

TOTAL FUNDING:

TOTAL COST:	\$4,100,000
FEDERAL COST:	\$2,100,000
NON-FEDERAL COST:	\$2,000,000

TOTAL FEDERAL COST THROUGH FY04:	\$ 440,000
FISCAL YEAR 05 BUDGET:	\$ 500,000
COST TO COMPLETE:	\$1,160,000

FY 04 ACCOMPLISHMENTS: The final draft Detailed Project Report and Environmental Impact Statement (DPR/EIS) is expected to be completed by the 4<sup>th</sup> Quarter of FY04 and will be ready for public review at that time.

FY 05 ACCOMPLISHMENTS: Obtain approval of DPR/EIS, execute Project Cooperation Agreement and initiate Plans and Specifications.

ISSUES AND OTHER INFORMATION: The San Francisco District worked with the sponsor to revise the Preliminary Restoration Plan, which was completed in the 3<sup>rd</sup> Quarter of FY03.

CONGRESSIONAL INTEREST: 12<sup>th</sup> District, Rep. Tom Lantos.

DISTRICT: San Francisco
